TECHNICAL PROJECTS

Portfolio

<https://sadafshaikh06.github.io/MyPortfolio.github.io/>

- My portfolio website is a showcase of my skills and accomplishments as a Frontend developer, designed and developed using cutting-edge technologies such as **HTML5**, **SCSS**, and **JavaScript**.
- Seamless navigation with the help of a well-structured and intuitive **navigation bar**.
- I have also integrated a **downloadable PDF version** of my **resume** with the help of which visitors can access and download my resume with just a click.
- To ensure a seamless experience for all users, I have implemented a **responsive design**, adapting the layout and elements to suit various screen sizes, from desktops to mobile devices.

To Do List Application

<https://sadafshaikh06.github.io/ToDoList-react/>

- A dynamic and intuitive To-Do List web application made using the latest web technologies: **HTML5**, **SCSS**, **JavaScript**, and the popular **React library**.
- The design is **clean**, **modern**, and **responsive**, ensuring that users can access and use the app effortlessly on various devices, including desktops, tablets, and smartphones.

Multi-Page Bootstrap Website

<https://sadafshaikh06.github.io/Bootstrap.github.io/>

- A multi-page website utilizing the power of **Bootstrap** to enhance the user experience and create a visually appealing platform.
- One of the key features of my **multi-page** website is its **responsive design**, achieved through Bootstrap's powerful tools. This ensures that the website looks polished and **functions flawlessly** on all devices, delivering a consistent user experience.
